Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Setteducati U.S. Patent 5,348,220.

Setteducati disclosed an apparatus comprising a case main body (1) which is formed into a hollow rectangular parallelepiped; a coin receiving opening closing lid (4) for closing a coin receiving opening (121) which is one of the openings of the case main body; an interior of the case main body is divided by a partition plate (18) (see Fig. 7) into two portions; the partition plate is fixed to an interior surface of a top wall (3) of the case main body and a slit (see column 4, lines 64-65) is formed between a lower end of the partition plate and a bottom wall (11) of the case main body (applicant's claim 1).

The accommodating opening closing lid (4) is constructed so as to be brought into engagement with the main body at the coin accommodating opening so that the closing lid does not come off the coin accommodating opening while being operated (applicant's claim 5).

Allowable Subject Matter

Claims 2-4, and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
